A West Side community planning board will form a committee to press for designations of several sites as

nations of several sites as landmarks.

The step, announced last night, was taken, according to the local board's chairman, to counter "a longstanding policy of ignoring the West Side's rich architectural heritage" by the city's Landmarks Preservation Commission.

It is unusual for a local planning board to establish a committee whose concern is neeking landmark designation for area sites. The Greenwich Village board has a Landmarks Committee, but only because the Village is a designated historic district and the committee serves as a watchdog of the Commis-sion's administration of the district.

Rita Aid, chairwoman of ittia Ain, ensittyonan or the local board, which covers 59 St. to 110 St., pointed out that is the seven years since passage of the Landmarks Law, only seven individual sites and no historic districts have been designated within the board's boundaries, Others, she said, had been proposed years ago, argued at public hearings and either rejected or left unacted

"Proph choose to live on the West Side because it! a a mixed area." Mrs. Aid said.
"It is mixed racially, econ-leally, ethnically, and it is architecturally mixed, too. We have a combination of the old and the new with the ser-old and the new with the sernave a communation of the old and the new with the em-phasis, thank God, on the old. It would be a nightmare if the West Side ever began to look like the East Side."
